## **WATER TANKS**

*Ensuring a healthy living*

IDEAL water tanks are manufactured in a highly sophisticated modern machinery and high quality control to give you world class products for different applications. We are the first water tank manufacturer to get an ISI and an ISO 9001 quality certification.

### HYGIENIC TANKS:

Fresh and clean drinking water is a basic need for all human beings on this planet, yet millions of people are deprived of this and number of ways adopted to store this precious natural resource. Since increased use of burnt plastic substances in the manufacture of storage tanks can have serious implications on fresh water bodies, it is imperative customers check the quality of material used in the manufacturing of storage tanks before buying. Water-related infections can, therefore, manifest on account of consumption of contaminated water, inadequate personal hygiene and through intermediate hosts of microbes that thrive in water, or due to the toxic elements used in the manufacture of storage tanks. Since the use of reprocessed waste materials can be hazardous to health, we ensure, Ideal tanks are moulded from 100% pure virgin UV stabilized grades of high quality FDA approved food grade polyethylene materials.

Our storage tanks are ideal for bulk storage of water and chemicals that are free from repairs, corrosion, odour and leakage there by maintaining the hygiene of the stored materials for long periods. As an eco-friendly and responsible brand, Ideal assures its customers safe drinking water which is the foundation for the prevention and control of water borne diseases and other side effects.

### SALIENT FEATURES:

- Very strong and long lasting.
- Complete leak proof & zero maintenance.
- Manufactured using 100% Pure virgin food grade material.
- Odour free and hygienic.
- Easy to Instal and handle due to light weight.
- Can be used for overhead, underground and indoor applications.
- Certified with ISI marking & ISO 9001.
- A guarantee of 10 years against any manufacturing defect.

## CYLINDRICAL VERTICAL TANKS WITH CLOSED TOPS

- Ideal for storage of water, acids, alkies and other chemicals.
- Available in Single Layer, Double Layer (inside white outside black) & Triple Layer (foam insulation between Double Layer tanks).

The dimensions are as follows.

S. NO.	CAPACITY IN LITRES	DIA	HEIGHT	MANHOLE DIA
1	200	660	690	280
2	300	700	850	280
3	400	820	940	280
4	500	840	1020	400
5	700	960	1090	400
6	750	910	1200	400
7	1000	1040	1310	400
8	1500	1255	1360	400
9	2000	1365	1560	450
10	2500	1465	1630	480
11	3000	1590	1640	480
12	4000	1590	2180	480
13	5000	1865	2055	450
14	7500	1865	2890	450
15	10000	1950	3540	480

## LOFT TANKS

Ideal for indoor use in kitchens, bathrooms, toilets, balconies etc., for water storage.

S. NO.	CAPACITY IN LITRES	L	B	H	HAND HOLE
1	150	660	660	380	290
2	300	1160	815	340	290
3	500	1265	990	480	290

- All Dimensions are in mm approx.
- Dimensions & Designs are subject to change without any prior notice.
